Laser system for Sodium

Sodium wavelengths

- D lines $\approx 589\text{nm}$
- D2 line
Cooling and Imaging
- D1 line
Pumping and Cooling
- Off resonance
 $(\delta \approx 10\text{GHz})$
Raman transition

Laser system for Sodium

Sodium wavelengths

1178nm seed diode laser

Laser diode from Innolume

- Tunable over > 100nm: 1175-1280nm
- Max power: 200mW
Max current: 500mA

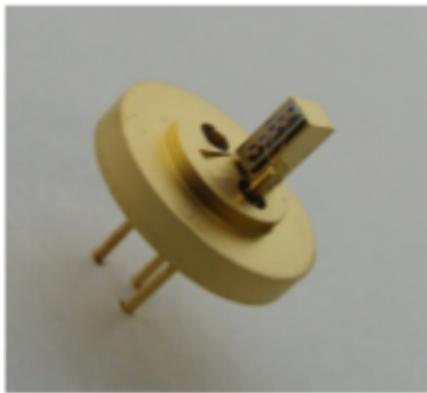

Picture from Innolume

1178nm seed diode laser

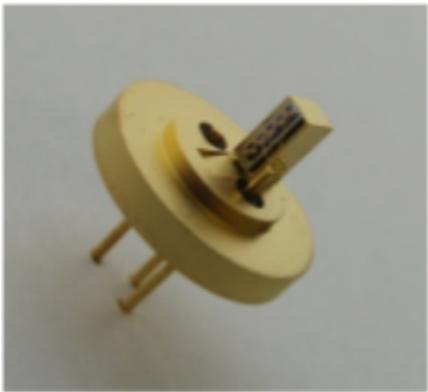

Laser diode from Innolume

- Tunable over $> 100\text{nm}$: 1175-1280nm
- Max power: 200mW
Max current: 500mA
